STUDIO GALAXY — DEVELOPMENT STUDIO

# We build things worth experiencing.

Digital products, experiences & intelligent systems.

TURN THE PAGE →

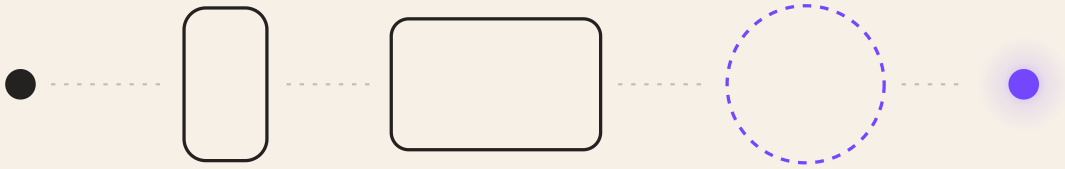

# Everything starts with a point.

AN IDEA IS ONLY THE BEGINNING.

# You have an idea.

Maybe it’s an app.
Maybe it’s a website.
Maybe it’s something
that doesn’t exist yet.

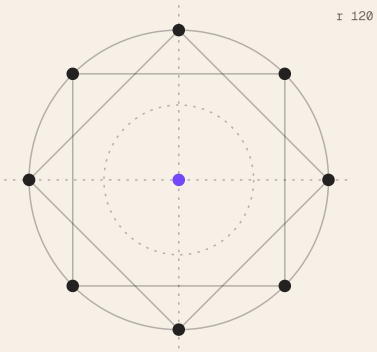

# That’s where we come in.

# From idea to reality.

01

## Idea

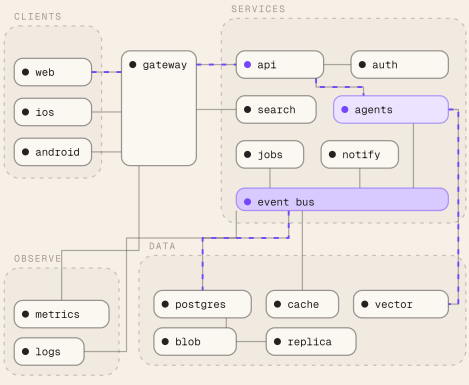

A SINGLE POINT.

02

## Design

THE POINT FINDS ITS FORM.

03

## Engineering

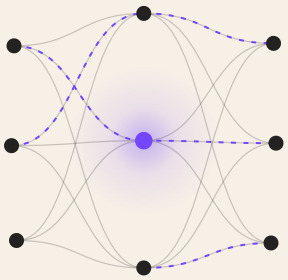

FORM BECOMES STRUCTURE.

# One continuous line.

04

## Intelligence

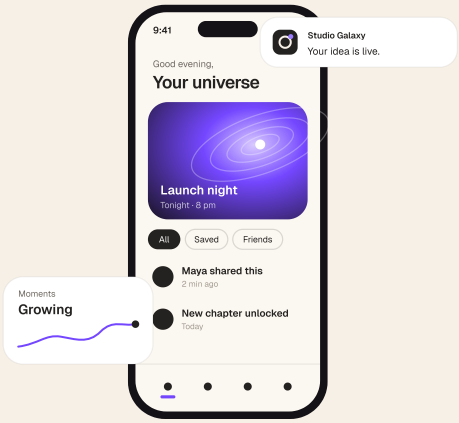

STRUCTURE STARTS TO THINK.

05

## Experience

EVERYTHING, IN SOMEONE'S HANDS.

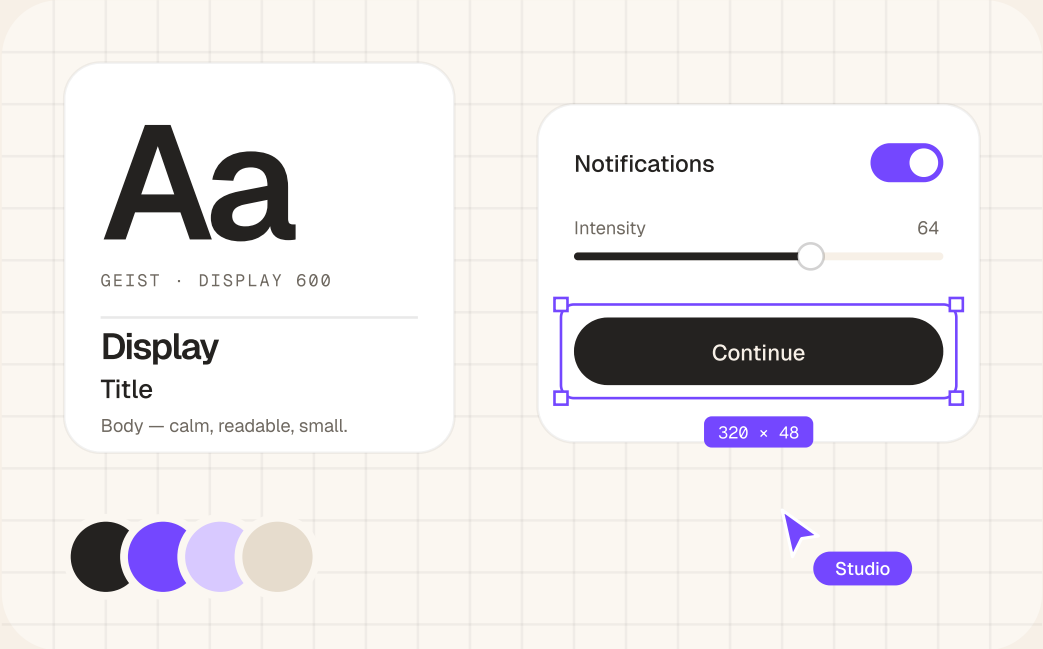

# From a single point to someone's hands.

Every project moves through the same five stages. Nothing is handed over half-finished.

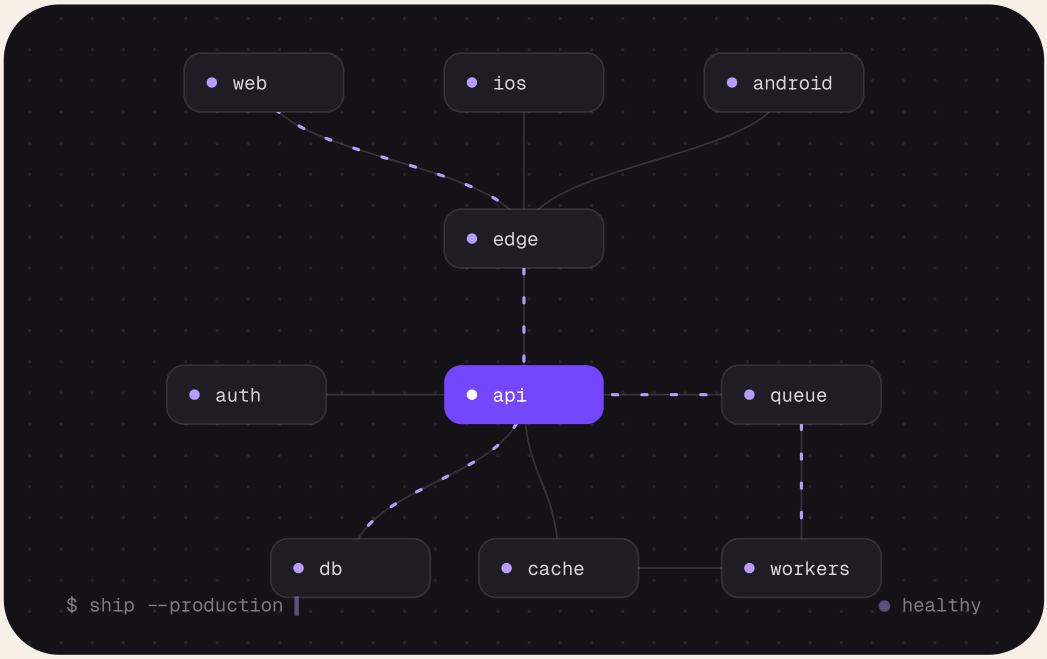

01 WE DESIGN

# Interfaces people want to use.

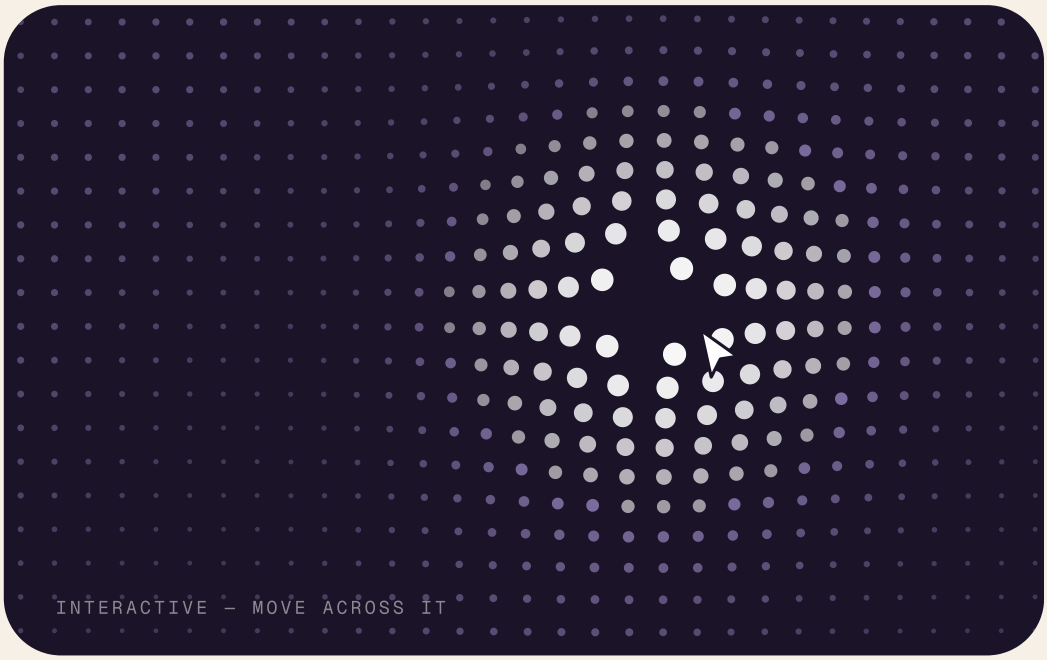

02 WE ENGINEER

# Systems built to actually work.

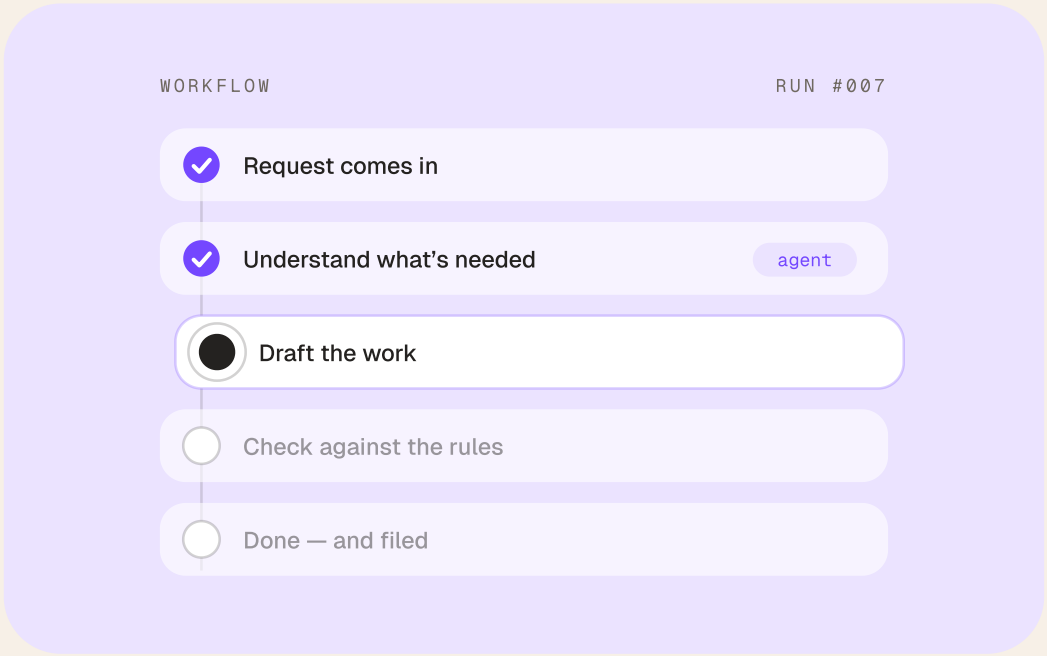

03 WE CREATE

# Experiences that feel alive.

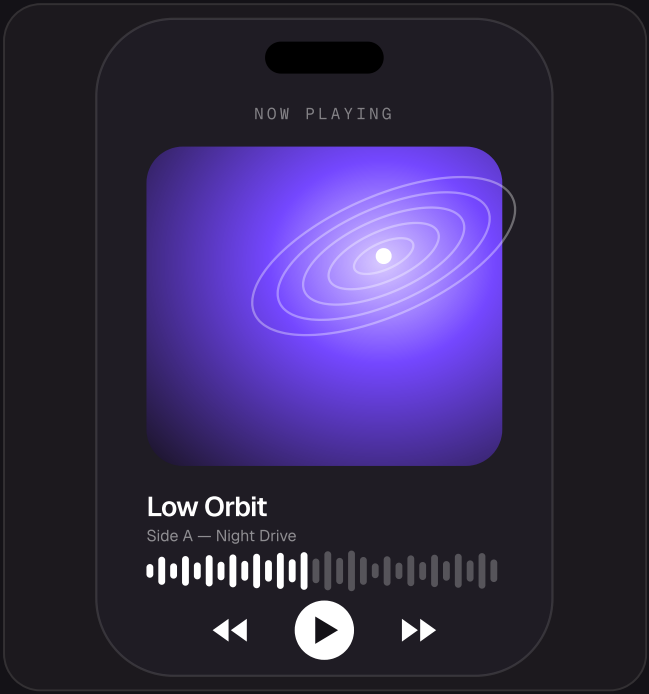

04 WE AUTOMATE

# Work that shouldn’t need to be repeated.

# What could we build?

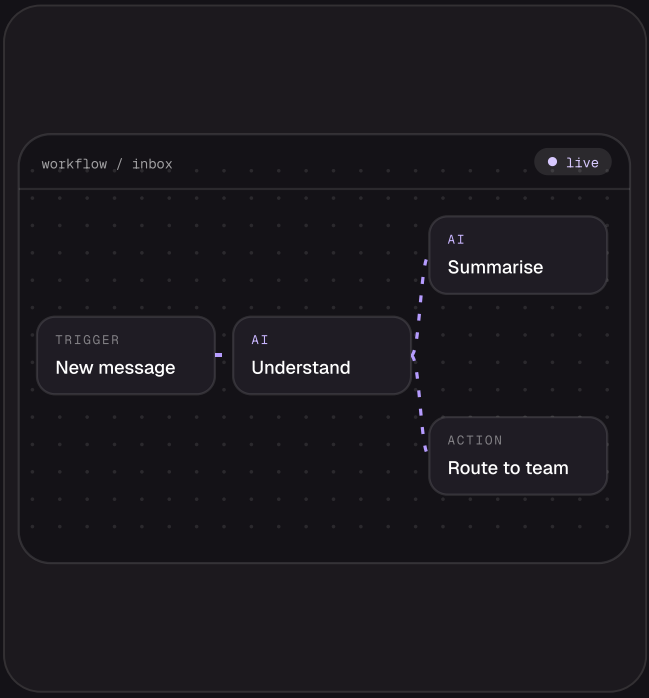

01 / 04

## A product people remember.

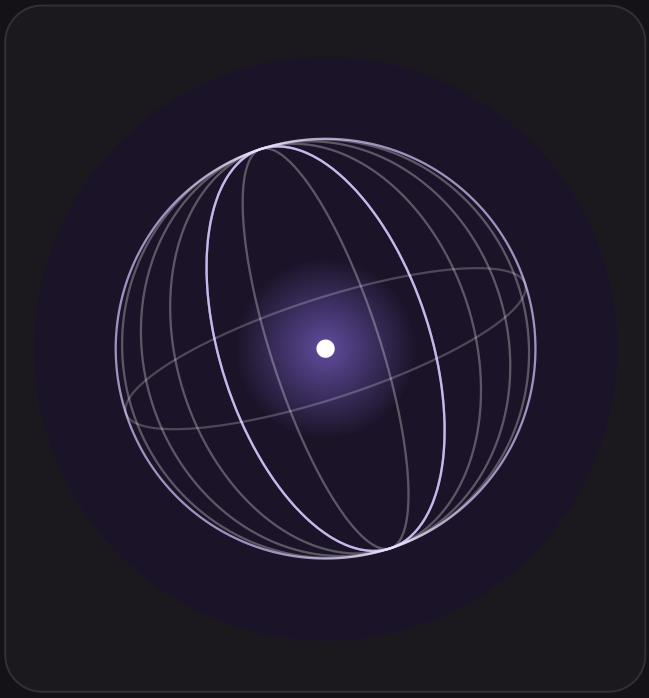

02 / 04

## An experience that scales.

03 / 04

## Technology that works for you.

04 / 04

## Something people don’t expect.

CONCEPTS, NOT CLIENT WORK — DEMONSTRATIONS OF WHAT’S POSSIBLE.

# Simple outside.
# Serious inside.

We start with the problem.

We understand the experience.

We design the system.

Frame · Auto layout

We build the technology.

We refine every detail.

# Until it feels right.

# Everything an idea needs.

01

## Design

- Product Design
- Design Systems
- UI / UX
- Motion & Interaction

02

## Engineering

- Web
- Backend
- Mobile
- Cloud

03

## Intelligence

- AI
- Agents
- Automation
- Data

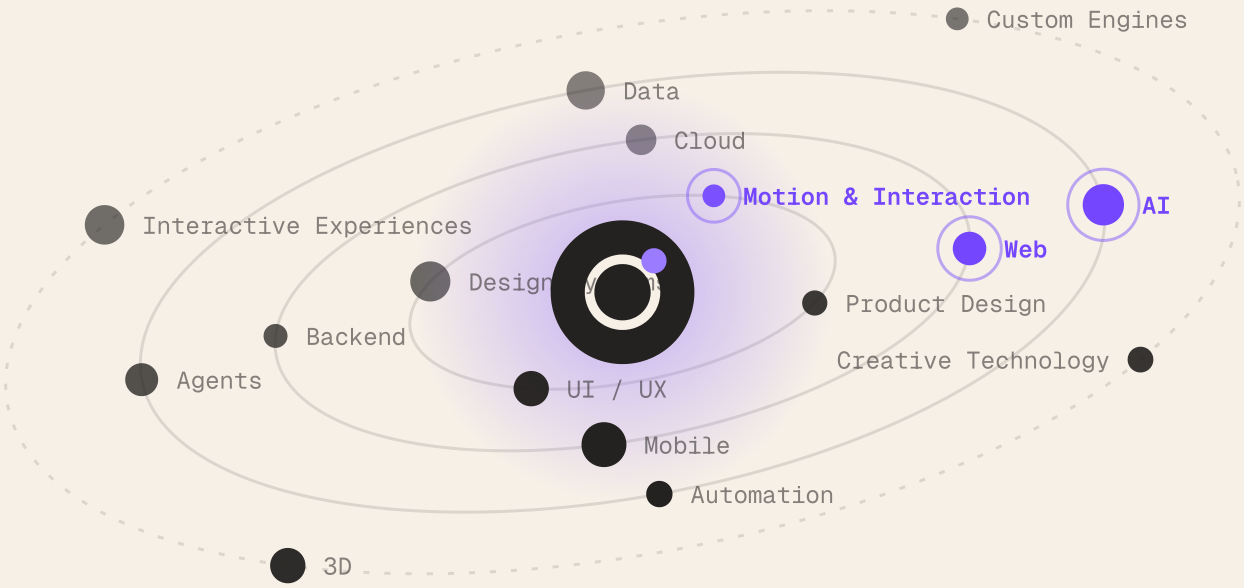

04

## Experimentation

- Creative Technology
- Interactive Experiences
- 3D
- Custom Engines

# One studio, from first sketch to launch.

# Different ideas.
# One universe.

# Studio Galaxy.

AN IDEA CAN BECOME AN ENTIRE UNIVERSE.

# Have an idea? Let’s build it.

Tell us what you’re imagining.
We’ll figure out the rest.

hello@studiogalaxy.org

THIS BROCHURE IS A FLIPBOOK

You’ve been turning pages built with our own Flipbook SDK — realistic page curl, two-page spreads, zoom and gestures, right in the browser. Want one for your catalogue, menu, magazine or report? Ask us.
